

PETORON

CRYPTOGRAPHIC ECOSYSTEM

September 15, 2025

Released a PTRN (Petoron) coin on the Ethereum mainnet

Petoron ERC-20 contract:

[0xCe675D637bB5E3aDAFDC4d1e475a35D75F6D95bc](https://etherscan.io/address/0xCe675D637bB5E3aDAFDC4d1e475a35D75F6D95bc)

Treasury:

0x31187017dC243d4D46126bB5a160Bb98FFeef39b

About & Vision

PTRN (Petoron) It's an ERC-20 token with a fixed supply (20 000 000), originally created to support Petoron cryptography ecosystem. what makes it interesting is that it can also function as a loyalty or bonus currency inside platforms like online casinos.

It was designed as part of the Petoron cryptography ecosystem with a simple principle: transparency and honesty.

No minting functions, No hidden admin keys, No inflation.

PTRN was not conceived as a speculative meme coin, but as a truly utility token. its role is to serve as a means of payment, as well as a means of exchanging bonus currency for loyalty programs and as a proof of commitment to building an open, verifiable, and secure cryptographic ecosystem. Every PTRN transaction is recorded on the blockchain, all rules are immutable, and the supply is permanently limited. this ensures ptrn's long-term reliability and makes it suitable for payments, partnerships, and integrations.

The concept is simple:

You could allocate ptrn as part of your bonus program. for example, alongside deposit matches or free spins, a player could also receive a certain amount of PTRN. these tokens could then be redeemed within your platform for additional perks such as free spins, cashback, or exclusive access.

From your perspective, it works just like traditional bonus points, but with two advantages:

- 1. Transparency and trust – PTRN lives on Ethereum, so balances and transfers are verifiable.
- 2. Flexibility – players can hold or transfer ptrn outside of the casino ecosystem, which adds an extra layer of value.

This could differentiate your casino by offering a blockchain-based bonus system without changing your core operations.

Tokenomics & Security

Total Supply:	20,000,000 PTRN (fixed forever)
Decimals:	8 (enabling precise micro-payments) 0.00000001
Circulating Supply:	≈105,000 PTRN (PTRN/USDT Pool)
Treasury Reserve:	Multi-Million PTRN For Integrations & Partnerships

Security principles:

- Immutable supply - no mint beyond 20m.
- No hidden admin functions or backdoors.
- Verified and published on Etherscan.
- Fully open-source philosophy: Petoron repositories are available on [GitHub](#) and [SourceForge](#).

Tax / Fee-on-transfer

There is no built-in transaction fee in the PTRN contract.

- When you send PTRN from one wallet to another, the contract does not withhold interest, does not burn, and does not cut the amount.
- The only cost is Ethereum gas (paid in ETH, like any standard ERC-20 transaction).
- The gas amount depends on the network (usually \$0.5–2 in ETH under normal load).

Thus, the PTRN is transferred "cleanly" in full. the commission is only Ethereum gas. the contract does not implement tax functions (marketing fees, liquidity fees, etc.), so there are no hidden fees.

PTRN / Software

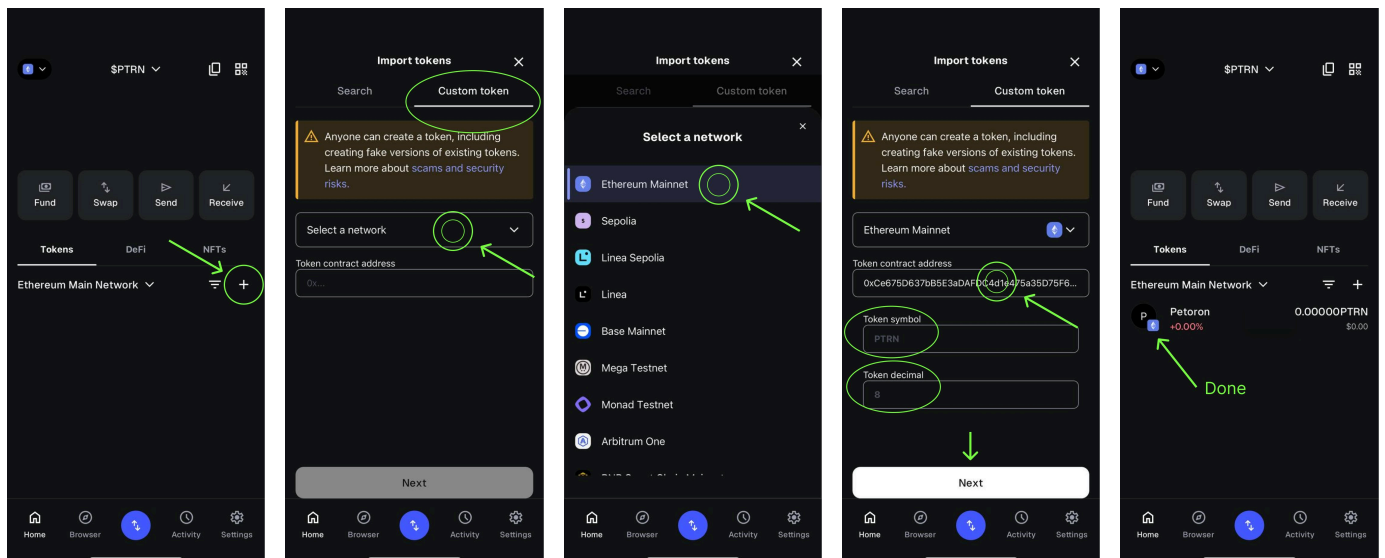

Petoron is an entire cryptography ecosystem developed to give people real tools for privacy and data protection:

-  PTBC — Petoron Time Burn Cipher (time-based self-destructing encryption)
-  PSC — Petoron Seal Contracts (tamper-proof sealed data)
-  PCA — Petoron Crypto Archiver (secure archiving)
-  PLD — Petoron Local Destroyer (irreversible deletion)
-  PQS — Petoron Quantum Standard (quantum-resistant encryption)
-  P2P Messenger — Fully encrypted peer-to-peer communication

PTRN was created to connect these technologies with the decentralized finance world. It's more than just a token - it's a symbol of trust, scarcity, and open-source integrity.

How to add PTRN to MetaMask/Trust Wallet

1. Copy the token contract address:
0xce675d637bb5e3adafdc4d1e475a35d75f6d95bc
2. Open your wallet:
In MetaMask: open the app or extension in your browser
In TrustWallet: open the app
3. Select the Ethereum mainnet network
PTRN operates on the Ethereum mainnet, make sure you select this network.
3. Click import or custom tokens (at the bottom of the asset list).
 - Insert the contract address:
0xce675d637bb5e3adafdc4d1e475a35d75f6d95bc
 - The remaining fields will be filled in automatically (symbol: PTRN, decimals: 8).
 - Click import token
4. Done, now PTRN will appear in your list of assets, and you can:
 - Store Coins
 - Receive Transfers
 - Send PTRN to other users (with gas fees in ETH)

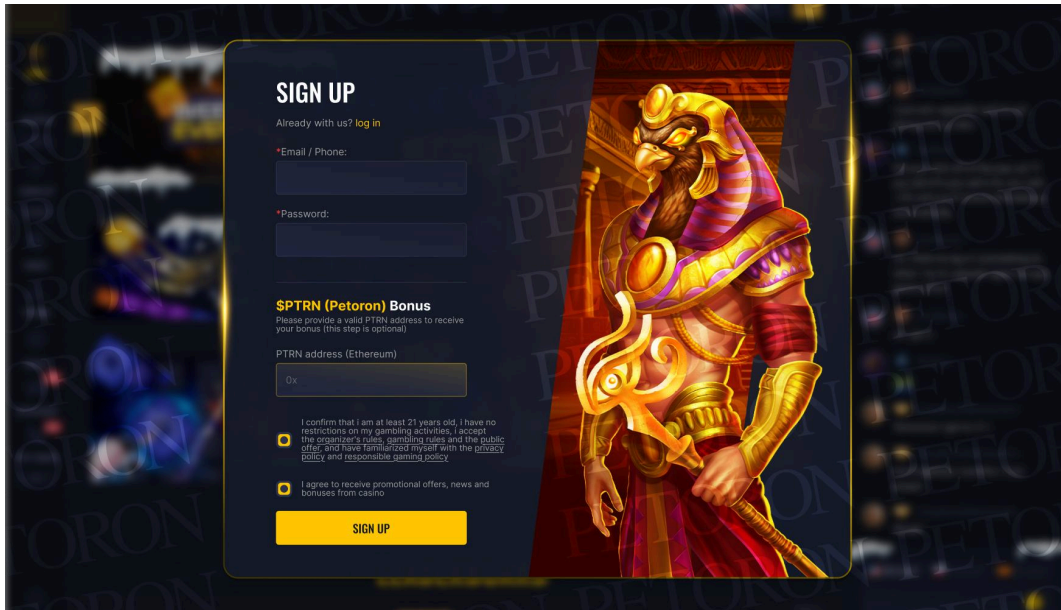

using the MetaMask interface as an example

Be sure to keep some eth in your wallet (even \$1–2 is enough), otherwise PTRN transactions will not be able to go through, since gas is paid in ETH.

Examples loyalty

What the registration page might look like, in which the user can receive a certain amount of PTRN as a bonus upon registration and can exchange them for various promotions:

Conclusion

Petoron (PTRN) has two primary utilities: as a payment currency and as a loyalty/bonus token. as a payment currency, ptrn works like Bitcoin or Ethereum — it can be transferred between wallets, requires only eth gas, and supports precise accounting with 8 decimals.

It is suitable for direct payments, microtransactions, and as a medium of exchange in digital platforms. as a loyalty currency, PTRN can be allocated to users as part of promotional campaigns.

For example, an online casino can distribute ptrn alongside deposit bonuses. players may redeem PTRN for free spins, cashback, or vip features. unlike traditional loyalty points, ptrn is a real cryptocurrency: transferable, storable, and tradeable.

The Petoron ecosystem strengthens PTRN role with additional cryptographic projects.

If you want to try implementing PTRN in your loyalty program or payment transactions, you can receive a certain amount of PTRN in your account absolutely free, for testing on your online platform.

THANK YOU FOR YOUR ATTENTION !
